County to consider water recommendations

By C. J. Pan, Staff Writer

A new report by the California Water Resources Board recommends several changes to the way water is managed in the county. The recommendations include increased conservation efforts, improved water infrastructure, and the development of new water sources.

The report highlights the need for a comprehensive water management plan that takes into account the unique challenges faced by the county. The plan calls for the creation of a task force to oversee the implementation of the recommendations.

County officials are expected to review the report and make decisions on how to proceed. The report is available on the county website.
